➢ Online Food Delivery

This project explains the basic workflow of an online food delivery application. The process consists of four main steps:

1. Login / Register

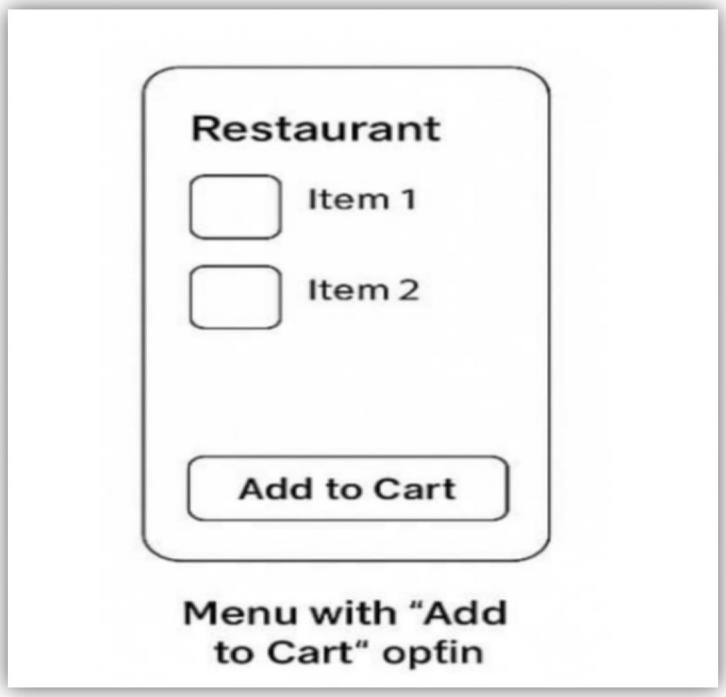
The first step for the user is to either log in if they already have an account or register if they are a new user. The login requires credentials such as email and password. A sign-up option is also available for new users to create an account.

2. Select Restaurant

After logging in, the user is presented with a list of restaurants. From this list, the user can select their preferred restaurant from which they want to order food. Each restaurant has its own unique menu.

3. Add Food (Menu & Add to Cart)

Once a restaurant is selected, its menu items are displayed. The user can choose the desired food items and add them to the cart using the “Add to Cart” option. Multiple items can be added to the cart as per the user’s preference.

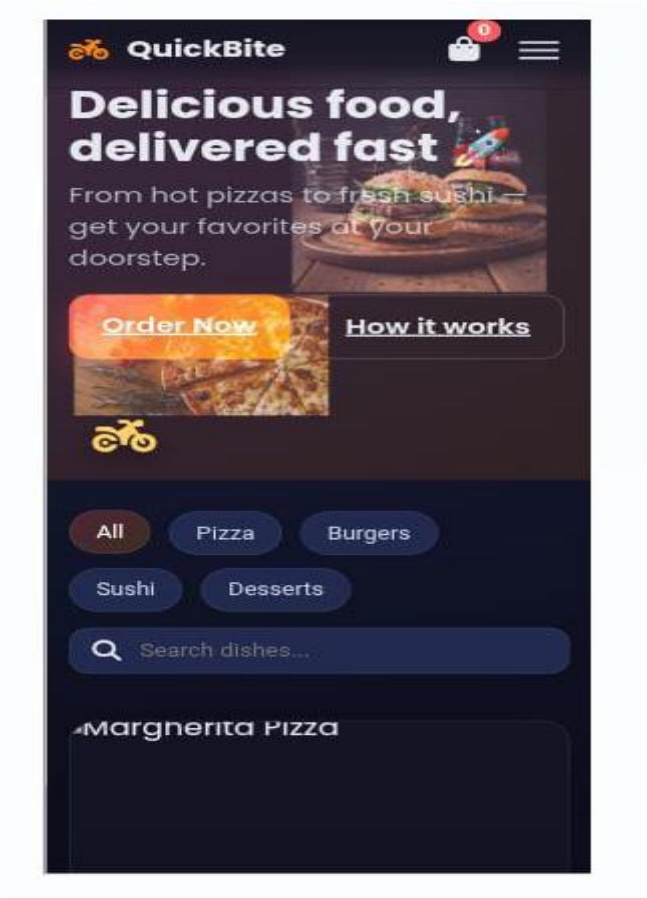


4. Order Summary & Checkout

After adding items to the cart, the user can view the Order Summary. This shows the selected items, their quantities, and total cost. The user can review the order before proceeding. Finally, the user clicks on the Checkout button to confirm the order, make payment, and complete the process.

Home Page:

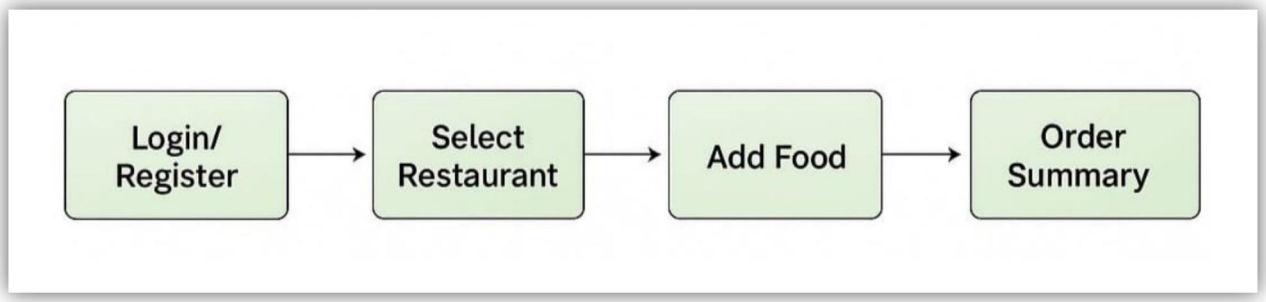
The **Home Page** is the starting point of the Event Management System. It welcomes users with a clear introduction and provides easy navigation to all main features. From the Home Page, students and faculty can quickly access login/register options, browse upcoming events, and manage their registrations. The page is designed in a simple, mobile-friendly layout to make it easy for everyone to use.



Procedural steps:

1. Login / Register — Open the app or website and sign in. If you don't have an account, register with an email/phone and password.

2. Select Restaurant — Browse or search restaurants, check menus and ratings, then pick one.

3. Add Food — Choose dishes, set quantities and any options (size, toppings), then add them to the cart.


4. Order Summary — Review the cart (items, prices, delivery fee, taxes), enter delivery address and payment method, then confirm the order.
